## **Double win for M J Mapp at the 'Green Apple Awards'**

M J Mapp have been awarded two Green Apple Awards in recognition of their work in embedding sustainable business practices across their property management services.

Awards were received for their centrally managed sustainability strategy which, since altering the scope of their Environmental Management System, now extends to all property under management; and for a specific waste management initiative at 55 Bishopsgate, EC2 a large office building in Central London.

### **Carl Brooks, M J Mapp's Head of Sustainability, said:**

"It is incredibly satisfying to win these awards as they demonstrate how a clear strategy enables improved performance across the business. I am especially pleased for the team at 55 Bishopsgate for seizing the initiative and to improve their local performance and it illustrates the success we have had in engaging our property management teams and supply chain since the changes made to their EMS"

M J Mapp is a market leader in the management of commercial and mixed use property and employs nearly 250 people to manage around £8.75 billion of commercial property and 4,500 occupiers throughout the United Kingdom for a variety of leading funds, REIT's and other investors in Real Estate.
